

Magenta™

OOCYTE ASSESSMENT FOR IVF

PATIENT

FF ID: 000123031658388
Patient ID: 0361-6838MK
Name: Jane Doe
Age\Date of Birth: 37\ Oct. 10, 1985
Date of Retrieval: March 14, 2023

CLINIC

Doctor: User Doctor
Clinic: Future Fertility
Phone: +1 628 246 2222
Email: futurefertility@info.com

REPORT

Number of oocytes: 13
Date of report: March 14, 2023

Jane's Report

MAGENTA is an oocyte evaluation tool.

The score ranges between 0 and 10.0. A higher score correlates with a higher oocyte potential to become a blastocyst.

OOCYTES

You have **13** mature oocytes evaluated

MAGENTA SCORE REFERENCE

Magenta score	0-2.5	2.6-5	5.1-7.5	7.6-10
Blastocyst Rate*	31.5%	42.6%	47.8%	57.2%

*Blastocyst rate refers to the percent of oocytes that became a blastocyst within that Magenta score range. The percent is based on ~4000 oocyte images that were analyzed by Magenta

SYNOPSIS

Definitions:

Oocyte - A mature egg.

Blastocyst - A day 5 or a day 6 embryo.

Live Birth - Delivery of a baby.

Normal Semen Analysis - Based on WHO 2010 Semen Analysis criteria.

- For more detailed information please visit <https://www.futurefertility.com/violet-definitions/>

Mature Oocyte Diagram

Report info:

Product version: Oocyte Software IVF R2.1

Report version: 2.3.0

Disclaimer and additional information:

The Oocyte Score is based on MAGENTA - proprietary image analysis technology. MAGENTA is an AI-based predictive model consisting of an ensemble of custom deep neural networks trained to analyze 2D images of oocytes to predict blastocyst development (1,2). MAGENTA's predictions for blastocyst development assume normal semen analysis; thus focusing specifically on the oocyte's contribution to blastocyst development (3). Other external factors, besides the oocyte and sperm quality, may impact blastocyst development.

Future Fertility does its best to provide the most accurate results based on state-of-the-art technologies and software development. MAGENTA is under investigation for its predictive potential as part of this study. Outcome predictions may additionally be affected by suboptimal image quality. Results are designed for information purposes only and are used to collect data on the model's performance. MAGENTA is not intended to substitute professional medical advice or replace the patient-doctor consultation about your particular condition. Please speak to your health care provider about your circumstances prior to making any decisions. For investigational use only. IPR Tracking Number: 2021-2547-3817-1
