Report

Date of Retrieval 01 Jan 2025
Date of Transfer 06 Jan 2025
Date of Report 06 Jan 2025

Oocyte Information

# Oocytes Retrieved	20
# MII Oocytes	16
# MII Inseminated	16
# MII Fertilized	12

Sperm Information

Collection Method	Ejaculated
Condition	Fresh
Source	Partner

Fertilization Information

Fertilization Method	ICSI
# Blastocysts Frozen	5

Your Transferred Embryo

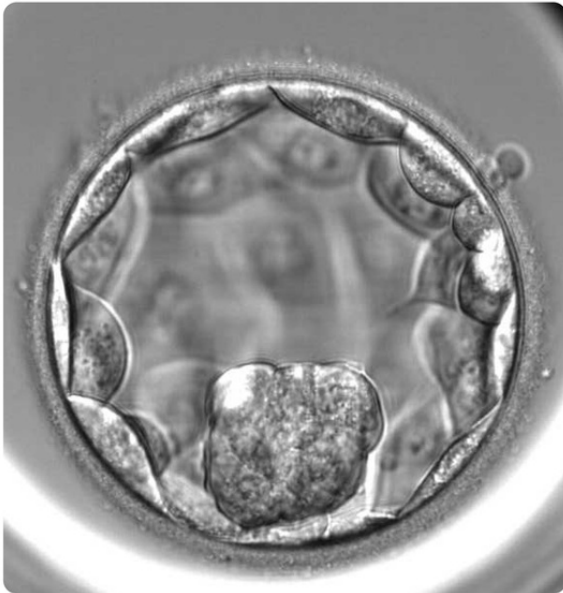

Fresh Transfer

Embryo 05

Gardner Grade 5AB

PGTA Results N/A

Magenta Score 8.7

Comments

Based on this summary of embryo development, the embryo was selected for transfer.

Normal fertilization: 2 pronuclei (PN), 2 polar bodies (PB) present.

Day 2: Embryo reached 4 cell stage, <10% fragmentation, good symmetry.

Day 3: Embryo reached 8 cell stage, <10% fragmentation, good symmetry.

Day 5: Hatching blastocyst (5AB), with tightly packed inner cell mass, ICM (destined to become the future baby), and several cells forming a loose trophectoderm, TE (layer of cells that form the placenta).

Image shows your blastocyst stage embryo just prior to transfer.
